The natural-hair layering brush. Kolinsky holds a high volume of liquid and returns to a fine point after every stroke, supporting controlled filigree and fine-detail work.

HOW TO USE

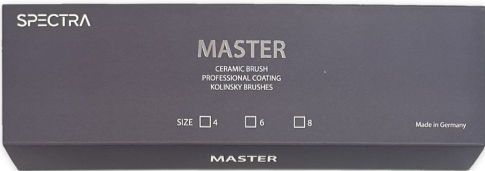

- Build porcelain layers in small and large amounts
- Use for filigree and fine-detail work
- Work on a clean, dry or lightly moistened surface

FEATURES

- Extra-slim, finely pointed tip
- Very good shape retention
- Very high liquid-holding capacity
- Metal handle designed for long service

The synthetic counterpart to MASTER in the same three sizes. It releases liquid predictably and rinses clean between shades, giving technicians a consistent alternative to natural hair.

HOW TO USE

- Apply small and large amounts of porcelain material
- Suitable for most filigree layering work
- Rinse and reshape the tip between colours

FEATURES

- Slim, pointed profile
- Stable and precise tip
- Defined liquid release
- Integrated micro-balls in the handle

A flat Kolinsky head for the opaque layer. Short and elastic, it helps the masking coat go down evenly without unwanted ridging.

HOW TO USE

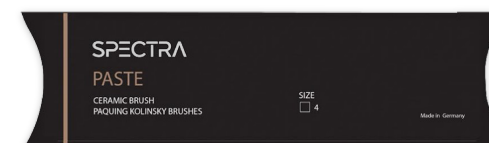

- Apply the opaque or masking layer precisely
- Use for detailed opaquing work
- Work with light, even strokes for full coverage

FEATURES

- Flat, precise brush head
- Elastic and strong tip
- Very good shape retention
- Durable, long-lasting construction
